CITROËN BERLINGO

ENHANCED TRACTION

BASE OF THE VEHICLE : BERLINGO

Engines:

1.6Hdi 75hp, 1.6Hdi 92hp, 1.6Hdi 110hp FAP

PRODUCT DESCRIPTION

Enhanced traction- The limited-slip differential FAM takes place of the classic differential.

Underbody protections:

- A front "ski" is installed under the engine and gearbox
- Sheets in metal protect the brake cables and fuel lines

Raised suspension:

- Original suspension is raised
- The heavy duty suspension is increased by approximately 25mm

Tires:

- The vehicle is equipped with "all-roads" or mixed snow/mud tires

USE

-A vehicle which is equipped with reinforced traction system asks no specific skills of the user.

-The limited-slip differential FAM functions automatically without manipulations of the user.

- On vehicles which are equipped of the reinforced traction, the limited-slip differential transfer until 25% of engine torque on the wheel which has the best grip.

- The vehicle is able to continue advancing, what allow taking out of difficult situations.
